EXPERIENCE

Full Stack Software Engineer | Enflux | Guatemala

2021 – Present

Enflux provides a powerful decision support platform for higher education institutions. As a Full Stack Software Engineer my contributions and responsibilities are about building high valuable applications for Academic Decision Support: A frontend and backend applications that provides high level information and feedback for mentors and committees.

Consultant | Sestra Group | Guatemala

2018 – present

Sestra Group is a pharmaceutical and medical company that works promoting health and seek with the highest standards to establish itself as a brand recognized throughout the world. Between my contributions and responsibilities are: Define a high engineering level design for the company's vision. Review solutions for billing and medical consulting; internal and external solutions. Plan and monitor the execution for online requests and assistance.

Technical Lead | Cognits | Guatemala

2018 – 2020

Cognits provides Digital Expertise across the SaaS Marketplace for companies looking to drive quality and scale in their professional services. The projects in which I have collaborated are: Oriental Bank and Promerica. In both projects I helped to provide them solutions for: Web and Mobile applications where clients were able to interact with their accounts.

Software Engineer | Paypal | Guatemala

2015 – 2017

Paypal is company operating a worldwide online payments system that supports online money transfers. I helped to develop services Node/Java based like: REST Orchestration API, Internal Tools for Infrastructure, Bill Payments Worker and Accounts Promotions.

EDUCATION

Science and Systems Engineering | Universidad de San Carlos de Guatemala

2011-2016
